
DAY-6 & LAB-6

Step 4 — Privacy Risks

Information	Risk	Action
Name	Personal	Replace with [PASSENGER NAME]
Passport/Aadhaar	Sensitive identity	Remove
Mobile/Email	Contact	Remove
Booking reference	Travel information	Replace with [BOOKING REFERENCE]
Flight/Date	Travel information	Use placeholders
Medical details	Sensitive	Remove
Card details	Financial	Remove
24-hour promise	Unsupported	Verify
₹20,000 compensation	Policy claim	Verify

Step 5 — Placeholders

Use: [PASSENGER NAME], [BOOKING REFERENCE], [FLIGHT NUMBER], [TRAVEL DATE], [FLIGHT ROUTE], [MEDICAL INFORMATION REMOVED], [PAYMENT INFORMATION REMOVED].

Step 6 — Safe Prompt

Draft a professional email to [PASSENGER NAME] regarding delayed baggage on [FLIGHT NUMBER]. Apologise for the inconvenience and direct the passenger to the authorised customer-service channel. Do not include personal, medical or payment information. Do not promise compensation or delivery time. Verify all policy and status information.

Step 7 — Comparison

- Unsafe: Contains PII, medical and financial information; makes unsupported promises.
- Safe: Uses placeholders, removes sensitive data and requires verification.

Conclusion: The original prompt was not safe to use as it contained personal and sensitive details. Those details were taken out and replaced with placeholders. Compensation and delivery information must be verified through authorised systems. A human review is needed before sending the final email.

Step 8 — Classification

- Advertisement — Public
- Airport address — Public
- Flight schedule — Public
- Staff schedule — Internal
- Passenger satisfaction report — Confidential
- Booking reference — Confidential
- Passport number — Restricted
- Payment information — Restricted
- Employee password — Restricted
- Security procedure — Restricted
- Baggage policy — Public
- Medical request — Restricted

Step 9 — PII Challenge

A: Name, mobile, booking reference → Remove/replace.

B: Name, flight, medical condition → Remove sensitive details.

C: Name, employee ID, password → Never share password.

D: Name, card and bank details, booking reference → Remove financial data.

Step 10 — Safe Prompts

1. Cancellation: Draft a cancellation email using [PASSENGER NAME] and [FLIGHT NUMBER]. Do not include personal details.
2. Assistance: Draft a professional assistance response without mentioning medical details.
3. Employee: Draft an internal security incident report using placeholders. Never include passwords.
4. Refund: Draft a refund response using placeholders. Do not include card or bank details.

Step 12 — Data Minimisation

1. Unnecessary: age, address, passport, phone and PNR.
2. Minimised prompts reduce privacy risk.
3. Minimum: passenger name + verified delay + desired tone.
4. Add booking, compensation and contact details only through authorised systems.

Step 13 — Own Prompt

Situation: Baggage delay

PII: Name, booking, flight, medical/contact details

Placeholders: [PASSENGER NAME], [BOOKING REFERENCE], [FLIGHT NUMBER]

Safe prompt: Draft a professional baggage-delay email using placeholders. Do not include sensitive information.

Verification: Verify baggage status and compensation policy.

Human review: Yes.

Step 14 — Reflection

1. PII = information that identifies a person.
2. Passport, Aadhaar, medical, payment and booking information.
3. Booking references can expose travel-account information.
4. Placeholders protect real information.
5. Data minimisation = use only necessary information.
6. Medical data is private health information.
7. If unsure, don't upload it; ask an authorised person.
8. Passwords can provide account access.
9. AI outputs may contain errors and need review.
10. I removed sensitive details and added placeholders and verification instructions.
